EXPERIENCE

Full-stack Developer (Intern) 04/2025 - Present
SupSoft Tech Philippines Remote

I'm currently working as a Full Stack Developer intern at SupSoft Tech, where I contribute to both frontend and backend development. I'm focused on sharpening my skills, gaining real-world experience, and learning how to build scalable web applications in a professional environment.

Mern Stack Developer 12/2024 -Present
Upwork Remote

Developing full-stack web applications using React, Node.js, Express.js, and MongoDB. Collaborating with clients on platforms like Upwork and PeoplePerHour to deliver responsive, scalable, and user-friendly solutions. Focused on clean code, API integration, and continuous learning.

Education

Bachelors in Computer Science 02/2024 02/2028
University of Karachi , Karachi

Skills

- HTML/CSS
- JavaScript
- React
- Bootstrap/Tailwind
- Nodejs
- Node.js
- Express.js
- MongoDB
- SQL
- PHP
- Larvel
- Git / Github

Projects

Facebook Clone (Frontend Only)

- Built a responsive Facebook clone using React.js, simulating core UI and user interactions
- Used JSON data to manage fake user accounts, post content, and simulated authorization
- Implemented dynamic routing for multiple pages .
- Developed a post section with fully functional likes and comments.
- Emphasized component reusability, state management, and seamless user experience.

AI Powered Expense App (Full Stack)

- Implemented authentication and authorization to securely manage multiple users.
- Users can add/delete income and expenses, with built-in voice recognition for hands-free input.
- Integrated OCR functionality to extract amount, source, and total from uploaded receipt images.
- Developed an AI-powered suggestion system based on net savings and spending patterns.
- Built a dynamic dashboard with charts for financial analysis, along with email alerts and report generation features.

Ecommerce App with Admin Dashboard (Full Stack)

- Implemented authentication and authorization for users and a separate admin login panel.
- Admins can add/delete products, apply dynamic discounts, manage sizes, and update order statuses via a full-featured dashboard.
- Users can sign up, log in, search/filter products, save favorites, and place orders with Cash on Delivery.
- Developed cart functionality with real-time item management and secure order placement.
- Built an admin dashboard for real-time sales analysis and order tracking.

SUMMARY

I specialize in building scalable web applications using technologies like React, Node.js, Express.js, and MongoDB. I'm also proficient with REST APIs, Git, and GitHub. I'm comfortable working both independently and as part of a collaborative team. I'm always eager to learn new technologies, grow my skill set, and take on exciting development challenges.

KEY ACHIEVEMENTS

- ☐ Speed Optimization Success
Increased application speed by 30% through optimized React.js code.
- ☐ Client Projects Deliveries
Developed 10 full-stack web applications for diverse clients on Upwork.
- ☐ Backend Efficiency Boost
Enhanced backend efficiency, reducing server response time by 40%.
- ☐ Customer Satisfaction Excellence
Achieved a customer satisfaction rate of 95% from completed projects.
